

** NEW PRODUCT ANNOUNCEMENT **

HEX-A-JUST® 4.6L FORD 2v and 4v

Increase both torque and horsepower with improved cam timing balance. The patented Cloyes Hex-A-Just® system allows you to quickly make adjustments to meet any custom cam spec required to maximize your engines output.

- *Heat Treated, Billet Steel Cam, Crank and Secondary Sprockets vs. OE Powdered Metal*
- *Precision machined tooth profile vs. OE pressed profile*
- *HEX-A-JUST® infinite timing adjustment vs. non-adjustable OE*
- *Precision machined keyway and bore fitment vs. OE wide tolerance fit*
- *Exclusive light weight, fine finished performance chains*

2v - Full Kits – include ALL the timing components; two adjustable billet cam sprockets, billet steel crank sprocket, two fine finish chains, all guides and tensioners.

2v - Upgrade (Short) Kit - everything in this kit is an upgrade from OE
Two adjustable, billet cam sprockets, billet steel crank sprocket, two fine finish chains.
